# About Orbitalum

## Orbitalum Cutting + Welding

Founded in 1960 as a subsidiary of Georg Fischer (+GF+) and renamed Orbitalum in 2006, Orbitalum is the world's premier manufacturer of superior quality, long lasting tube cutting and pipe weld preparation machine tools and orbital welding systems. The Orbitalum cutting & beveling products shown in this catalog are the perfect complement to Orbitalum's orbital welding systems, as a precision weld prep is integral to a successful orbital welding program.

Orbitalum offers a full range of products from pipe and tube cutters, tube facing and squaring tools, pipe end prep machines and sophisticated orbital welding equipment, all engineered and built in Germany to rigorous standards under ISO 9001:2008. They exhibit the excellence that German products are renowned for, including high quality materials, high precision, robust designs, powerful drives, and ease of operation. They have wide applications in many industries:

HIGH PURITY APPLICATIONS	INDUSTRIAL APPLICATIONS
Semiconductor	Power Generation
Food, Dairy, Beverage	Boiler & Heat Exchanger
Biopharmaceutical	Fabrication Shop
Chemical & Petrochemical	Oil, Gas, Petrochemical
Aviation, Aerospace	Water & Gas Distribution

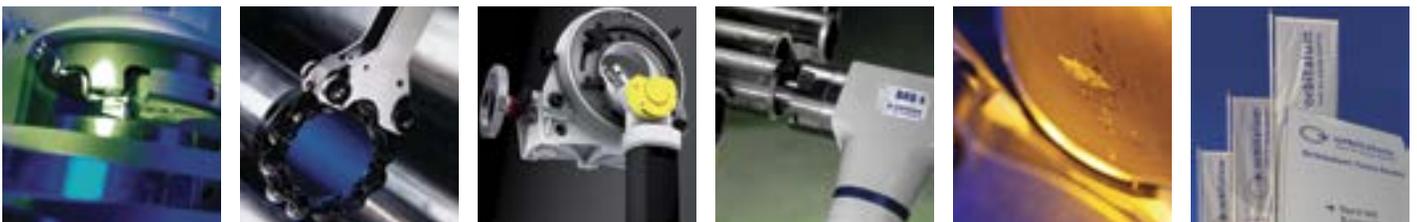

## ITW Orbital Cutting & Welding

Orbitalum Tools and E.H. Wachs are organized together as ITW Orbital Cutting & Welding, to provide our global customers one source for the finest in pipe & tube cutting, beveling and orbital welding products. When you partner with us you're not only partnering with the industry leader in portable weld preparation machine tools and orbital welding systems, you're partnering with ITW, the industry leader in advanced welding technologies.

Orbitalum cutting and welding equipment is sold, serviced and rented in North and South America by E.H. Wachs, headquartered in Lincolnshire, Illinois near Chicago. With a large selection of Orbitalum machines and accessories in stock and ready for immediate shipment, Wachs backs you up with the expert advice and support our customers have relied on for over 130 years. Together we combine to make Orbitalum the industry's best built and supported cutting and facing machines. Visit the Sales, Service and Rental Center nearest you, contact your local Wachs or Orbitalum representative or learn more online at [ehwachs.com](http://ehwachs.com).

## Genuine Parts + Factory Service

E.H. Wachs offers genuine Orbitalum replacement parts and full repair services with factory trained and certified service technicians. Our large inventory of OEM parts and consumables are designed to help keep your Orbitalum product operating at peak efficiency. It's all part of our commitment to supplying our customers with affordably priced parts and service so you can continue to enjoy Orbitalum's unrivaled productivity for years to come.

# Orbimat Power Supply

## Orbitalum Welding

Smart buyers look for the best combination of power, features, ROI and ease of use in an orbital welding system. With these systems Orbitalum is reducing delivery times, overly expensive parts, and complex operation.

We encourage you to review the wide selection of Orbitalum orbital welding products in this catalog. Contact your local Wachs representative for further information or to arrange a product demonstration. Afterwards you'll agree when it comes to the best orbital welding systems they're built in Germany but made for the Americas

## Orbimat Power Supplies

Orbitalum's power supply units are available in two sizes, the compact Orbimat® 165 and the mid size Orbimat® 300. CA models can be equipped with the sophisticated BUP Control® which adjusts internal gas purge pressure to facilitate control of the weld profile.

The Orbimat 300 is also available in two higher end models, the 300 CA AC/DC (Multi-Current) and 300 CA AVC/OSC (Arc Voltage/Oscillation Control). All of these auto-programmable units can be equipped with the affordable, segment leading Orbitwin® switching units that add dual welding head capability to deliver unparalleled productivity. The best built, all Orbimat welding power supplies sold in the Americas include a full 2 Year Limited Warranty.

### Orbimat 165

- Versatile Power Supply
- Lightweight and Compact
- Orbitwin® Compatible

Orbitalum's top selling Orbimat® 165 is a versatile supply unit featuring auto input voltage sensing for connection to a wide range of input power, from 85 – 260V 50/60 Hz single phase. Its lightweight and compact design features an integrated water cooling system, while the optional Orbicool® water cooling system can be added for extra heavy duty applications. Its high visibility multi-language 10.5" (2.68cm) color display interfaces to the PSS self diagnostic program, and allows the user to select from up to 5,000 welding procedures and data logging stored in internal memory.

Orbitalum's auto programming is standard and features real time adjustment of all parameters, plus automatic recognition of connected orbital welding heads including Orbitwin®. The Orbimat 165 CA includes a flip-up screen with multifunctional rotary control, and the Force Flow® adjustable arc gas feature to minimize pre-purge times.

### Orbimat 300

- Mid Size Power Supply
- Extra Power for Bigger Jobs
- AC/DC & AVC/OSC Models Available

The Orbimat® 300 line offers the power needed to handle bigger jobs. It features a powerful 300 amp control range in a mid size package that splits the difference between small desktop welding systems and large, cumbersome machines. The 300 model offers features similar to the 165 line but exclusively utilize an external Orbicool® cooling system to handle the extra power. The 300 CA AC/DC is a computer controlled multi-current unit that, in addition to the CA model features offers the option of AC welding for aluminum.

The top of line 300 CA AVC/OSC offers arc voltage control that calculates and programs the length of the arc automatically from the voltage characteristics, and oscillation edge holding times that are synchronized with high pulse settings. A scanner for setting the seam centerline is included, with an offset function for asymmetric weld seams.

# Orbiweld and Orbitwin

## Orbiweld Enclosed Weld Heads

- Easy to Use
- Superior Construction
- Unique Water Cooling Arrangement

Orbitalum offers a full line of Orbiweld® enclosed autogenous weld heads to cover tube and pipe sizes ranging from 1/8" tube to 6" OD pipe (DN6-150). In addition there are heavy duty versions capable of aluminum welding plus the "S" series designed for ultra low clearance.

Every Orbiweld enclosed weld head is constructed of the finest materials and feature a unique water cooling design to cool the rotor at its contact point, allowing for very high duty cycles.

Orbiweld standard collets are permanent tooling and not a "consumable" item like lesser manufacturers. Collets are available in narrow and wide widths for most heads to assure consistently true, square mounting.

## Orbitwin Switching Unit

- Segment Leading Feature
- Connect Two Heads to One Supply
- Unique at this Price Point

Orbitalum sets new standards in productivity and user convenience with the segment leading Orbitwin® weld head switching unit. No other manufacturer has anything like it at this price point. It allows the connection and alternate operation of two weld heads from a single power supply to deliver maximum productivity at minimal cost.

With Orbitwin the operator can position a second weld head while the first weld head is in operation, or alternatively connect a closed orbital weld head and open head to the same machine without the need to stop and change over. The Orbitwin conveniently latches underneath the Orbimat® without increasing the machines footprint. There are Orbitwin units available for all 165 and 300 models excluding the 300 CA AVC/OSC.

## Tube-to-Tubesheet Weld Heads

- Fast ROI Tubesheet Weld System
- Industry Leading PRAI Weld Heads
- Advanced Weld Head Cooling

Orbitalum Orbimat® welding systems with Orbitwin are unrivaled for fast, economical tube to tubesheet welding. To further strengthen their dominance in the field Orbitalum recently acquired PRAI of Rome, Italy, universally acknowledged as the world's leading manufacturer of tube to tubesheet orbital weld heads.

The pairing of the versatile Orbimat® line of power supply controllers with the world class P20 and P16 tubesheet orbital weld heads creates a powerful, simple, robust and low cost tube to tubesheet welding system. An Orbimat 300CA power supply fitted with a Orbitwin Switching Station and two P20 or P16 heads allows a single operator to set up one weld head while the second is welding, doubling productivity.

# Complete Solutions. One Source.

## Technology + Orbitalum

Orbitalum has remained the industry leader in high quality tube cutting and facing equipment for over 50 years. Since our beginnings as a division of Georg Fischer we've strived to engineer machines that are as good as we can possibly make them, with robust construction, ergonomic designs and intuitive controls. Orbitalum cutting tools are the perfect complement to Orbitalum's complete line of orbital welding systems, and others as well, as the perfect preps they produce help produce a perfect weld.

## Orbital Saws + Blades

Orbitalum manufactures the world's best selling tube and pipe saws, including the GF 4 and GF 6 that utilizes an orbital cutting motion around a stationary workpiece. Now with anthracite colored coating for added anti-corrosion properties, these saws produce a precision cut that is so square it's often considered weld ready. The innovative GFX series of saws incorporate everything we've learned about portable cutting machines in a compact, lightweight design. Our robust RA 8 and RA 12 saws are designed and built to handle larger outside diameters, while the PS portable saws are optimized designs for portability. To keep your saws cutting at peak efficiency, always specify OEM factory replacement blades by Orbitalum.

## Tube Facing + Squaring

Orbitalum offers a wide range of top selling RPG series tube squaring machines where the model number indicates the maximum OD in inches. These include the RPG One, RPG 1.5, RPG 2.5 and the larger RPG 4.5, 4.5s, and RPG 8.6. All Orbitalum RPG machines are designed to produce perfectly square, burr free preps that are required for critical, defect free orbital welding applications. All Orbitalum squaring machines are electrically powered, with convenient cordless drive offered on select models.

## Boiler Tube + End Prep

For demanding, high production boiler tube work Orbitalum manufactures a complete line of BRB boiler tube bevelers including the revolutionary BRB 2 Full Auto that automates tiring, repetitive motions. The BRB bevelers are offered in a choice of electric, pneumatic or pneumatic/auto clamping drives that, depending on configuration, will clamp a pipe ID of .5" to 4.4" (12.75-112mm).

The powerful electric and pneumatic driven REB 6 and REB 14 end preparation machines feature an integrated stand and the QTC® Quick Tool Change System, and are highly productive in continuous, high volume production settings such as fabrication shop applications.

## Orbital Welding

Of all the major manufacturers, only Orbitalum designs and builds a complete line of cutting and weld prep machine tools plus a complete line of orbital welding systems. It makes us uniquely qualified to understand the entire welding process, and the needs of our users worldwide so we can deliver Complete Solutions. One Source.

# Orbital Welding Power Supplies

ORBIMAT CA - compact orbital welding power supply

# Orbital Welding Power Supplies

*Simple and convenient operation thanks to multifunctional rotary actuator*

*Clearly laid-out 10.5" flip-up monitor*

*Integrated job printer allows actual values to be printed out*

*Automatic programming and multilingual menu navigation via color display*

*PSS Pro-Service System:  
Simple functional test with no need to open the unit*

## Orbital welding power supplies ORBIMAT CA

The ORBIMAT CAAdvanced series of orbital welding power supplies are equipped with a new and unique operating concept.

In addition to the reliable automatic programming which generates welding parameters by entering the tube diameter, wall thickness, material, and welding gas all ORBIMAT CA models also have the exclusive new development FLOW FORCE to reduce the pre-flow gas time when the weld heads are closed in the standard model and BUP control function with controllable, position-dependent tube internal pressure control as an optional extra.

**The basic model of the ORBIMAT CA series includes the following functions and equipment:**

- Simple and convenient operation thanks to multifunctional rotary actuator.
- Control option for cold wire feed.
- DC welding.
- Optimal visibility and operating conditions thanks to clearly laid-out 10.5" flip-up monitor.
- Graphically-supported operating interface and multilingual menu navigation via color display.
- Capacity to store over 5,000 welding programs, providing systematic and clear program management thanks to the creation of folder structures.
- Welding data logging and printout of actual values.
- A multcard reader enables data to be transferred easily to an external PC.
- It is possible to extend memory and data exchange using CompactFlash card (CF), SD, MMC, Sony memory stick.
- (Optional) PC-offline software with the capability to convert data protocols to PDF.
- Extremely easy to service thanks to PSS (Pro Service System):
  - Simple functional test with no need to open the unit.
  - Easy to service and components can be replaced quickly thanks to systematic component structure.
- Power and motor slope adjustment between the individual sectors.
- Coolant water and welding gas are monitored.
- Option to program up to 99 sectors.
- Possibility of connecting a monitor or printer (through VGA).
- Integrated printer.
- Metric and imperial units.

**Scope of delivery ORBIMAT CA power supplies:**

- 1 orbital welding power supply of the ORBIMAT CA series
- 1 connection hose set ORBIMAT
- 1 blind plug
- 1 welding connector adapter 165A/300A
- 1 external keyboard
- 1 liter antifreeze
- 1 filling funnel
- 2 keys for key switch
- 1 operation manual

# Orbital Welding Power Supplies

## ORBIMAT 165 CA

Computer-controlled 165 A compact power supply for orbital welding  
 – ideal for mobile use on building sites.

Additional functions and equipment:

- Integrated water cooling system for cooling the connected weld heads.
- WIDE RANGE input voltages for safe operation of power sets or voltage networks with extreme fluctuations in voltage.

Technical Data	ORBIMAT 165 CA
Connection voltage (WIDE-RANGE)	90 - 260 V, 50/60 Hz, single-phase
Control range	2 - 165 A for a connection voltage > 160 V 2 - 110 A for a connection voltage < 160 V
Power-on time	30% at 165 A 100% at 120 A
Weight	26 kg
Dimensions	510 x 360 x 220 mm

Item	Code	kg
ORBIMAT 165 CA	871 000 001	26.000

ORBIMAT 165 CA

## ORBIMAT 300 CA

Computer-controlled 300 A power supply for orbital welding.

Please note that the ORBIMAT 300 CA may only be operated in conjunction with a water cooling system that must be ordered separately.

Technical Data	ORBIMAT 300 CA
Connection voltage	400 V +/- 15%, 50/60 Hz, 3 phase
Control range	5 - 300 A
Power-on time	40% at 300 A 60% at 260 A 100% at 220 A
Weight	33 kg
Dimensions	530 x 400 x 400 mm

Item	Code	kg
ORBIMAT 300 CA	872 000 001	33.000

ORBIMAT 300 CA

# Orbital Welding Power Supplies

ORBIMAT 300 CA AC/DC

## ORBIMAT 300 CA AC/DC

Computer-controlled 300 A power supply for orbital welding, also for aluminum materials.

Additional functions and equipment:

- Alongside the benefits of the ORBIMAT 300 CA power supply, this device also offers the option of AC welding.
- Option to set a positive and negative half-cycle in the ratio 20 - 80%.
- Frequency setting 50 - 200 Hz.
- Detection of actual values for the welding reports in the DC regime.

Please note that the ORBIMAT 300 CA AC/DC may only be operated in conjunction with a water cooling system that must be ordered separately.

Technical Data	ORBIMAT 300 CA AC/DC
Connection voltage	400 V +/- 15%, 50/60 Hz, 3 phase
Control range	5 - 300 A
DC and AC currently (switch selectable)	40% at 300 A 60% at 260 A 100% at 220 A
Power-on time	
Weight	41.4 kg
Dimensions	530 x 400 x 400 mm

Item	Code	kg
ORBIMAT 300 CA AC/DC	877 000 001	41.400

## ORBIMAT 300 CA AVC/OSC

Computer-controlled 300 A power supply for orbital welding with arc voltage control (AVC) and oscillation (OSC).

Additional functions and equipment:

- The new arc voltage control calculates and programs the length of the arc automatically in „mm“ from the current voltage characteristics. This avoids the usual time spent calculating the necessary arc voltage each time the weld power changes to maintain the arc at a consistent length in the individual sectors.
- During oscillation each of the edge holding times can be synchronized with the high-pulse settings.
- The center of the seam can be accessed manually and be determined using an automatic scanner. The electrode accesses each of side of the seam and then calculates the center of the path automatically. For asymmetric weld seam configurations this is compensated by an OFFSET function.
- Including remote control (cable length: 7.5 m) *Code 875 050 001*.
- There is the option of an HF-free touch start ignition.

Please note that the ORBIMAT 300 CA AVC/OSC may only be operated in conjunction with a water cooling system that must be ordered separately.

Technical Data	ORBIMAT 300 CA AVC/OSC
Connection voltage	400 V +/- 15%, 50/60 Hz, 3 phase
Control range	5 - 300 A
Power-on time	40% at 300 A 60% at 260 A 100% at 220 A
Weight	37.3 kg
Dimensions	530 x 400 x 400 mm

Item	Code	kg
ORBIMAT 300 CA AVC/OSC	872 000 002	37.300

ORBIMAT 300 CA AVC/OSC  
incl. remote control

## Water cooling systems for ORBIMAT power supplies

*ORBICAR W trolley  
with integrated water coolant*

### ORBICAR W trolley with integrated water coolant

The ORBICAR W trolley is the perfect accessory for the Orbitalum 300 A power supplies due to the integrated water cooling. In addition to the water cooling the trolley has a gas bottle holder.

Item	Suitable for ORBIMAT	Code	kg
ORBICAR W trolley with integrated water coolant	300 CB, 300 CA, 300 CA AC/DC	884 000 002	58.200
ORBICAR W trolley with integrated water coolant*	165 CA, 165 CB	884 000 004	58.200

*ORBICOOL Active*

### ORBICOOL Active

Very efficient compressor cooling device with constant and adjustable water temperature. Including water flow sensor. Significantly increases cooling performance for the weld heads. Particularly suitable for welding units in series production.

Suitable for all\* ORBIMAT orbital welding power supplies.

Technical Data	ORBICOOL Active
Coolant capacity	814 W
Connected load	0.58 kW
Maximum power consumption	6.2 A
Mains voltage	230 V, 50 Hz
Water tank capacity	6 l
Coolant type	air-cooled
Dimensions (lxwxh)	565 x 440 x 335 mm

Item	Code	kg
ORBICOOL Active for OM 165 CA/CB*	889 000 001	40.000
ORBICOOL Active for OM 300 CA/CB	889 000 002	40.000

\*The power supply ORBIMAT 165A series has to be modified in our plant.

# Orbital Welding Power Supply Accessories

## ORBITWIN switching device

To increase productivity, the switching unit ORBITWIN is available, with which 2 welding heads can be operated alternately on the ORBITWIN. The previously assigned program is recalled automatically when the start key of the weld head is actuated. The welding head that is not being used is locked and can be prepared for the next welding operation.

Item	Suitable for ORBITWIN	Code	kg
ORBITWIN 165 CA switching device	165 CA	861 000 001	8.800
ORBITWIN 300 switching device*	all ORBITWIN 300	876 000 001	8.800

\*not compatible with AVC/OSC machines.

ORBITWIN 300 switching device

## ORBICAR S trolley

The ORBICAR S is a practical trolley with storage shelf and an option of securing a gas cylinder. The ORBICAR S trolley can be combined with all power supplies of the ORBITWIN series. This trolley is most commonly used an orbital welding power supply of the ORBITWIN 165 A series.

Item	Code	kg
ORBICAR S trolley	884 000 001	19.100

ORBICAR S trolley

## Durable carrying case

Protects the power supply during transport and during on-site storage. Can be supplied for ORBITWIN 165 CB/CA and ORBITWIN 300 CB/CA (incl. ORBITCOOL Compact).

Item	Suitable for ORBITWIN	Code	kg
Carrying case	165 CB, 165 CA	OT-871-001	17.500
Carrying case	300 CB, 300 CA, 300 CA AC/DC	874 050 001	20.800

Durable carrying case

# Orbital Welding Power Supply Accessories

*ORBmax Digital Oxygen Analyzer*

## ORBmax

Orbitalum presents the revolutionary ORBmax, a 100% digital oxygen analyzer that measures and monitors oxygen particle count faster and with higher accuracy than ever thought possible. It eliminates uncontrolled, unmonitored purging and presumption of acceptable oxygen levels required for exacting weld standards. With its maintenance free optical sensor, the ORBmax measures oxygen PPM with high precision to ensure highly repeatable, oxidation free welds.

Requiring no warm up time, the ORBmax displays a large numerical oxygen particle count in PPM on a user friendly touch screen. The display doubles as an input device, and changes color from red to green to indicate when the preset oxygen value has been reached. The unit also features an alarm mode with an audible warning should the oxygen content rise above the preset PPM level.

The ORBmax interfaces with Orbitalum's Orbimat® series of orbital welding power supplies to prevent the start of a welding program until the user defined oxygen value has been reached. These measured values can be digitally logged and saved via a user selectable save interval to an SD card for purge documentation.

The ORBmax features a compact, rugged water and dust resistant enclosure with a built in air pump allowing for active and passive oxygen content measurement. The unit comes with a protective cover that doubles as a solid table stand for easier viewing of the display. The ORBmax is a "must have" for the highly controlled, high purity welding requirements commonly found in the semiconductor, pharmaceutical and aerospace industries.

### ORBmax Features

- Measures oxygen levels down to .0001% (1 PPM)
- Highly accurate readout +/- .00005% (.5 PPM)
- Recordable/Traceable with SD card
- Compact design with touch screen
- Water and dust resistant, built to IP32
- Self contained air pump for active oxygen measuring
- Maintenance free optical oxygen sensor
- Quick response, no warm up time required
- Large digital readout with color change
- Alarm mode with audible beeper
- User selectable alarm value and saving interval
- Built in cover transforms into stand
- Multi-range power supply
- Connects directly to Orbimat® power supply (cable required)

Item	Code
ORBmax digital oxygen analyzer	882 000 002

# Orbital Welding Power Supply Accessories

## ORBIPURGE forming set

Complete with Teflon gas hose and quick release couplings.

The ORBIPURGE forming set for tube internal diameter 12 - 110 mm (0.472 - 4.331 inch) includes all accessories for fast and efficient internal forming during orbital welding.

ORBIPURGE forming set

## BUP Control Box

The power supplies of the ORBIMAT CA-series offer the option in conjunction with the BUP control attachment to adjust the forming gas pressure in the inner tube via a pressure sensor, which compensates almost entirely for the often otherwise annoying entry of the seam weld into the sump position. At the same time, the gas pressure is modified automatically during welding by the system between a programmable minimum and maximum value depending on the position of the electrodes.

Including ORBIPURGE forming set for tube internal diameter 12 - 110 mm (0.472 - 4.331 inch). Complete with (3) Teflon gas hoses and rapid-action couplings.

BUP Control Box  
incl. ORBIPURGE forming set

Item	Suitable for ORBIMAT	Code	kg
BUP Control Box	165 CA, 300 CA	886 000 001	2.700

## Compact Flash Card

For storing weld data protocols or for extending the program memory (one is already included in the soft/hardware package). Capacity to store over 5,000 welding programs.

Compact Flash Card

Item	Code	kg
CompactFlash Card	875 012 056	0.010

## Software/Hardware package

Suitable for all ORBIMAT orbital welding power supplies.

For external programming and data documentation, consisting of:

- 1 CompactFlash card 32 MB for transferring data between the machine and PC.
- 1 USB card reader for exporting the CompactFlash card on the PC (no further device required).
- ORBIPROG\_CA software allows programs and protocols to be stored on the PC. All data can further be converted into PDF format, enabling this data to be read with practically any standard PC. Additionally, programs from C-series machines (e.g. OM 160 C) can be converted to CA format with the help of software. The parameters of the CA programs can be edited using the software and can be transferred back to CA models and used there after processing.

Soft-/Hardware package

## Enclosed orbital weld heads ORBIWELD

### Microweld head ORBIWELD 12

The ideal solution for welds in the semiconductor industry and in all applications where space is very limited. Also particularly suitable for welding all common microfittings.

With its extremely compact design and different clamping cartridges, the ORBIWELD 12 microweld head offers a uniquely versatile functionality and a high power-on time previously unknown for weld heads of this size thanks to the water coolant system. With an ORBIMAT series power supply you now have a highly accurate welding system that is yet simple to handle.

- Quick change system for clamping shells.
- Remote control built into the handle.
- Extremely narrow clamping cartridges (Version A).
- Wide clamping cartridge (Version B) with exchangeable clamping shells for standard applications.
- The removable clamping cartridge enables accurate alignment with the parts to be welded, even where there is very little space.

Including 7.5 m (24.6 ft) hose package and tool set.

Cable assembly extensions available.

The clamping cartridges and clamping shell shells should be ordered separately (see below).

*OW 12 with wide clamping cartridge (version B) and exchangeable clamping shells*

*OW 12 with narrow clamping cartridge (version A) especially for welding microfittings.*

*Clamping cartridge for OW 12 Version A (small)*

Item	Tube OD [mm]	Tube OD [inch]	Code	Weight weld head [kg]	Shipping weight [kg]
Microweld head OW 12	3.00 - 12.70	0.118 - 0.500	821 000 001	5.700	11.000

### Exchangeable clamping cartridges for OW 12 version A (narrow)

Clamping cartridges with a total width of only 12.7 mm (0.5 inch) can be supplied (version A, see below) for welding microfittings and other applications with very limited chuck lengths. For version A a separate clamping cartridge is required for every tube diameter.

Clamping shells set OW 12 version B wide (4pcs.)

## Clamping cartridge for OW 12 for microfittings

Clamping cartridge especially designed for microfittings applications. A separate clamping cartridge is required for each tube OD.

Possible welding applications:

- Microfitting to microfitting
- Microfitting to tube
- Tube to tube

Clamping cartridge microfitting for ORBIWELD 12

# Enclosed Orbital Weld Heads

Orbital weld head OW 19

## Orbital weld head OW 19

Enclosed orbital weld heads for tubes and microfittings.

Extremely narrow design and yet highly durable thanks to intensive water cooling system. The small dimensions of the OW 19 weld head make it ideal for applications where space is very limited, as is often the case in the semiconductor, air and aerospace, pharmaceutical and ultra pure water supply sectors.

- The 3-part clamping mechanism ensures that the head can be clamped in the most confined spaces, as even when open no parts protrude beyond the contour of the head. Equally, an exact alignment, with no misalignment is guaranteed with the parts to be welded.
- Using the keypad built into the handle, it is possible to specify all the necessary commands to the power supply without an additional remote control.

Including 7.5 m (24.6 ft) hose package and tool set.  
The clamping shell should be ordered separately.

Item	Tube OD [mm]	Tube OD [inch]	Code	Weight weld head [kg]	Shipping weight [kg]
Orbital weld head OW 19	3.00 - 19.05	0.118 - 0.750	822 000 001	7.500	14.800

## Clamping shells set for OW 19 (wide)

One set of clamping shells consists of 6 shells.

There are 2 version of clamping shells:

Version „W“ (wide) for standard applications.

Clamping shells set W OW 19 wide  
(6 pcs.)

# Enclosed Orbital Weld Heads

ORBIWELD 38S and ORBIWELD 76S

ORBIWELD 115S

ORBIWELD 115

## ORBIWELD 38S, 76S, 115S

Enclosed orbital weld heads with extremely narrow design and therefore highly durable thanks to the intensive water cooling system. The small dimensions of the ORBIWELD S-weld head series make it ideal for applications where space is very limited, as is often the case in pharmaceutical and similar application sectors.

- Quick change system for clamping shells. The clamping shells are simply clipped in and out without any additional tools.
- Completely water cooled
- Extremely narrow design allows welding of parts with short straight welding lengths
- Durable clamping shells for all tube dimensions guarantee secure, aligned part welding
- Power supply control panel built into the robust and durable aluminum handle, so that no additional remote control is required.

Including 7.5 m (24.6 ft) hose package and tool set.

Cable assembly extensions available.

The clamping shells should be ordered separately.

Item	Tube OD [mm]	Tube OD [inch]	Code	Weight weld head [kg]	Shipping weight [kg]

## ORBIWELD - 65, 115, 170

The ORBIWELD series is characterized by very high thermal load bearing capacity: It is therefore particularly suitable for applications in the chemical, pharmaceutical, and food industry, where ever greater demands are made on the closed weld heads by ever greater tube diameters and wall thicknesses.

Coolant channels running through the entire weld head body have provided for excellent heat dissipation that enable the ORBIWELD weld heads to work continuously even at high welding currents and intensive load. The closed design of the ORBIWELD series and the gas management system of the head ensure a permanent infiltration of the weld seam with during welding with insert gas, guaranteeing seams that are very low in welding colors.

- Quick change system for clamping shells. The clamping shells are simply clipped in and out without any additional tooling.
- Completely water cooled.
- Stable clamp connections in conjunction with clamping shells available for all tube dimensions guarantee secure clamping and centering of the parts to be welded without misalignment.
- All the important commands for welding can be transmitted to the power supply via a control panel built into the robust and durable aluminum handle, so that no additional remote control is required.

Including 7.5 m (24.6 ft) hose package and tool set. Cable assembly extensions available.

The clamping shells should be ordered separately.

# Enclosed Orbital Weld Heads

## Plastic case for clamping shells

With separate compartments to take up to 10 sets of standard shells.  
Without clamping shells.

Item	Code		kg
Plastic case for clamping shells for OW 38S	826 020 001		0.350
Plastic case for clamping shells for OW 65 and OW 76S	827 020 006		1.388
Plastic case for OW 115 and 115S	824 020 002		1.443

## Cavity shell for moldings (2 shells)

Clamping shell for welding shaped pieces (e.g. flange, flanged wheels and screw fittings in the food industry).

Item	Code		kg
Cavity shell for moldings OW 38S	826 050 010		0.146
Cavity shell for moldings for OW 76S	827 050 007		0.266
Cavity shell for moldings for OW 65	823 050 010		0.612
Cavity shell for moldings for OW 115/OW 115S	824 050 003		0.660
Cavity shell for moldings for OW 170	825 050 002		0.852

## Special clamping shells for orbital weld heads

T-Piece clamping shells

Clamping shell with the ability to take the hollowed tube and the tube to be welded.  
A complete set is required for each task and dimension.

Inner centering with simultaneous forming system consisting of:

- Mandrel
- Milled nut
- Welded part retainer
- Hollowed tube piece retainer

Shell for arc welding  
(retainer/cover)

## Shells for arc welding

For welding standard elbows without straight side attachment (elbow-to-elbow welding without straight side is not possible). When using this shell on a weld head side (left or right) only the gas protection around the elbow is guaranteed. There is no clamping so that the elbow has to be tacked in place before welding.

Shell consisting of:

- Two basic retainers independent of the tube diameter.
- Two covers independent of the tube diameter.

Please submit a drawing of the elbow or a sample part when placing the order

Retainer/Cover

The covers are placed into the retainer and can be turned so that the side of the elbow can exit at any angle from the welding held. The tube to be welded on the other side of the welding held must be straight and be clamped with shells from the particular standard clamping shell (standard shells not included).

Clamping shell for OW 38S

With the weld head OW 38S the covers are made to customer specification (2 halves) without retainers are placed directly into the head. A retainer is therefore not required. Please indicate the required pipe OD and inside radius of the elbow, in case an additional electrode adapter is needed.

## Open orbital weld heads ORBIWELD TP

### Open orbital weld heads ORBIWELD TP 250-1000

The ORBIWELD TP series has a unique design and functionality. An extremely compact design has been achieved thanks to the drive motor that is fully integrated into the housing. The completely new drive concept has made the well-known large and costly drives associated with conventional weld heads unnecessary.

#### Features:

- Can be used with and without cold wire attachment, as the cold wire feed nozzle can be adjusted exactly in both a vertical and horizontal direction via an adjustment unit.
- Open arc system.
- The arc length is kept at a constant gap mechanically.
- Infinitely variable clamping mechanism.
- The water-cooled TIG Torch head can be swiveled in any direction and allows fillet welds or short hollowed out tubes to be welded. In the models TP 400, 600, and 1000 the TIG Torch head is secured to a slide unit that allows the position of the electrodes to be finely adjusted with great accuracy even during welding.
- With a simple to operate control knob, it is possible to adjust the clamping area across the weld head's entire nominal range.
- The ORBIWELD TP weld heads with clamping shells made from tool steel ensures optimum retention to the tube's surface (very good grip properties).
- The weld heads are easily centered to the tube and are clamped in place with the help of a tension lever. No additional remote control is required thanks to the keys integrated directly into the weld head housing.
- The standard hose package length is 7.5 m (24.6 ft). Extensions are possible.

**Please note that the weld head needs for operation an earth cable as well as a control cable that must be ordered separately.**

### ORBIWELD TP 250 - 100 without cold wire unit

## Cold wire feeds for TP heads for retrofit

### Cold wire feed KD 4 for ORBIWELD TP 250

Cannot be used for ORBIWELD TP 400/600/1000.

Consisting of:

- Axis drive motor.
- Adjustable wire feed tips.
- Wire reel retainer for D 100 mm/1kg (3.937 inch) standard reels.
- External cold wire box.

Item	Code		kg
Cold wire feed KD 4 for ORBIWELD TP 250	811 050 001		2.000

### Cold wire feed KD 3-62 and KD 3-100 for ORBIWELD TP 400

Can be assembled directly on the weld head, also making pulse synchronous wire feed possible.

Consisting of:

- Axis drive motor.
- Adjustable wire feed tip.
- Wire reel retainer with D 62 mm/1 kg (2.440 inch) special wire reel (empty reel) with D 100 mm/1 kg (3.937 inch) standard reel

Item	Code		kg
Cold wire feed KD 3-62 for ORBIWELD TP 400 including empty reel	812 050 001		5.500
Additional empty reel for KD 3-62	812 018 019		0.038
Cold wire feed KD 3-100 for ORBIWELD TP 400*	812 050 061		-

\*For the retrofit the weld head has to be sent to the Orbitalum service department.

### Cold wire feed KD 3-100 for ORBIWELD TP 600

Can be assembled directly on the weld head, also making pulse synchronous wire feed possible.

Consisting of:

- Axis drive motor.
- Adjustable wire feed tip.
- Wire reel retainer for D 100/1kg (3.937 inch) standard wire reels.

Item	Code		kg
Cold wire feed KD 3-100 for ORBIWELD TP 600	813 050 001		0.680

### Cold wire feed KD 3-100 for ORBIWELD TP 1000

Can be assembled directly on the weld head, also making pulse synchronous wire feed possible.

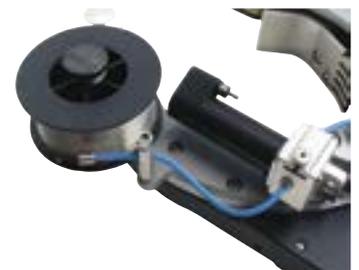

Consisting of:

- Axis drive motor.
- Adjustable wire feed tip.
- Wire reel retainer for D 100 mm/1kg (3.937 inch) standard wire reels.

Item	Code		kg
Cold wire feed KD 3-100 for ORBIWELD TP 1000	814 050 008		0.720

*KD 4 with open lift-off lid*

*KD 3-100 with D 100 standard wire reels*

# Open Orbital Weld Heads - TP

ORBIWELD TP 400 AVC/OSC

## Open orbital weld heads ORBIWELD TP AVC/OSC

### Open orbital weld heads ORBIWELD TP AVC/OSC with oscillation OSC and arc voltage control AVC

Can be used for thick wall tubes (multiple layer welds).  
As ORBIWELD TP (see p. 43). The weld heads of the ORBIWELD TP AVC/OSC series are also provided with a motorized travel option for the TIG Torch across the nominal diameter, so that no additional mechanical basic presetting is required for any change in the tube diameter.

Additional properties of the tube-to-tube weld heads ORBIWELD TP AVC/OSC with oscillation OSC and arc voltage control AVC:

- The oscillation width is 20 mm (0.787 inch).
- Cold feed wire feed unit with mount for D 100/1kg (3.937 Inch) wire reels fitted directly on the weld head.
- With a simple to operate control knob, it is possible to adjust the clamping area across the weld head's entire nominal range.
- **Please note that the weld head needs for operation an earth cable as well as a control cable that must be ordered separately.**

Item	Tube OD [mm]	Tube OD [inch]	Code	Weight weld head [kg]	Shipping weight [kg]
Open weld head TP 400 AVC/OSC*	30.00 - 115.00	1 ½ - 4 ½	812 000 002	12.700	24.800
Open weld head TP 600 AVC/OSC*	70.00 - 170.00	3 - 6	813 000 002	15.500	33.300
Open weld head TP 1000 AVC/OSC*	120.00 - 275.00	5 - 10	814 000 002	27.500	45.300

\* Only usable with an ORBIMAT CA AVC/OSC orbital welding power supply.

## Open Orbital Weld Heads - OP

OP series - open weld heads for applications with limited space

# Open Orbital Weld Heads - OP

## OP 46, OP 51, OP 102 (AVC/OSC)

The low profile OP series is ideal for applications with limited clearance.

### Benefits:

- Can be used with or without additional wire.
- Smallest space requirement thanks to compact design.
- OP 51 and OP 102 weld heads with arc voltage control (AVC) and oscillation (OSC) available
- The water-cooled torch head, machine body and clamping jaws assure highest resistance, even on preheated tubes.
- Horizontal, vertical and tilted welding positions are possible.
- Very robust and ergonomic design.
- Gas, water and electricity supply through a multiple hose made of viton enables safe and user-friendly working.
- Simple and fast assembly of the weld heads on the tube.

### Delivery includes:

- 1 basic machine
- 1 weld head module
- 1 cold wire feed

To be able to operate the weld heads, clamping jaws and a suitable earth cable are required, and are not included in the standard delivery and must be ordered separately.

\* Only usable with an ORBIMATCA AVC/OSC orbital welding power supply. \*\* Weight without connecting cable

## Clamping jaws

The water-cooled clamping jaws are produced for specific customers and can only be used for one specific exterior tube diameter (e.g. Ø 25 mm).

Therefore when you place your order, please specify the code no. of the desired clamping jaw and the exact exterior tube diameter that you would like to weld.

Clamping jaws for OP weld heads

Item	Tube OD [mm]	Tube OD [inch]	Suitable for	Code

## Open Orbital Weld Heads - HX 16

HX 16 - Open weld heads especially made for heat exchanger applications

# Open Orbital Weld Heads - HX 16

## Open orbital weld heads HX 16P, HX 16S

Ideal for applications with the smallest space availability thanks to their compact design.

Benefits:

- Optimum solution for welding pre-mounted elbows.
- Time efficient and easy pneumatic clamping on the tube (only HX 16P).
- Smallest space requirement thanks to compact design.
- Exact stepless adjustment of the tungsten position (only HX 16P).
- Very robust and ergonomic design.
- Simple and fast assembly of the weld heads on the tube.
- Self supporting weld head.

**To be able to operate the weld heads, clamping jaws and a suitable earth cable are also necessary, which are not included in the standard delivery and must be ordered separately.**

Open weld head HX 16S

Electrode Ø 1.6 [mm]

Minimum spacing between the tubes Formula:  $\frac{\text{Holder diameter} - \text{Tube OD}}{2} + 2$

Item	Tube OD [mm]	Holder module Ø [mm]	Code	kg
Open weld head HX 16P	15.0 - 16.0*	-	848 000 001	-
Open weld head HX 16S	12.7 - 16.0*	60	846 000 001	1.500

\* Smaller diameters on request.

## Tube-to-Tubesheet Orbital Weld Heads

P16, P20 - Weld Heads for tube-to-tubesheet orbital welding

# Tube-to-Tubesheet Orbital Weld Heads

## Tube-to-tubesheet orbital weld heads P16

With this TIG weld head, it easy problem to weld tubes to tubesheets with the highest of accuracy and consistent quality.

### Features:

- Completely water-cooled weld head housing.
- Water coolant that extends into the TIG Torch head.
- Simple handling with maximum functionality.
- Burner head up to 30° stepless inclination (reduced diameter range).
- Positioning to the tube to be welded is by means of a centering tool that is placed on a retaining arbor.
- Fitted with a cold wire feed mounted directly on the weld head including a retaining chanism for 100 mm (3.937 inch) standard wire reel.  
(Only with P16 with cold wire, 831 000 001)
- Includes and three-point support.
- Revolving wire feed on the rotational axis of the TIG burner prevents the additional wire from twisting as it exits the wire nozzle.
- Wire reel retainer for D100/1kg (3.937 inch) standard reels.
- The hose package length is 7.5 m (24.6 ft). Extensions cables also available.

*Tube-to-tubesheet weld head P16*

Technical data	P16

**\*Please note that the centering tools, the retaining arbors and the earth cable must be ordered separately.**

# Tube-to-Tubesheet Orbital Weld Heads

## Tube-to-tubesheet orbital weld heads P20

With this TIG weld head, welding tubes to tubesheets with the greatest of accuracy and consistent quality is not a problem.

### Features:

- Simple handling with maximum functionality.
- Water coolant that extends into the TIG burner head.
- Burner head up to 30° stepless inclination (reduced diameter range).
- Positioning to the tube to be welded is by means of a centering tool that is placed on a retaining arbor.
- Fitted with a cold wire feed mounted directly on the weld head including a retaining mechanism for D100 mm/1kg (3.937 inch) standard wire reel. (Only with P20 with cold wire, 832 000 002)
- Includes three-point support.
- Wire reel retainer for D100/1kg (3.937 inch) standard reels.
- The hose package length is 7.5 m (24.6 ft). Extension cables also available.

## Accessories for orbital welding

### Tungsten Grinder ESG Plus

ESG Plus

- No adjustment needs to be done before operation.
- Repeatable points every time due to preset grinding angles.
- Easy and fast to use.
- Optimum preparation for orbital and manual welding.
- Longitudinal grinding for optimum arc ignition and excellent arc stability.
- Guarantees longer tool life and ease of ignition of the tungsten electrode.
- Specially designed for one-off jobs on site.
- Compact design, optimum resilience and perfect reproducibility.
- Solid, functional design.
- Precise orbital grinding, very well centered.
- Grinding angles 15°; 18°; 22.5°; 30° or 15°, 30°, 45°; 60°.
- Facility for easy trimming of the electrodes (optional).
- External dust extractor can be easily adapted.
- Short preparation times with high grinding performance.

This ESG Plus is the perfect hand-held grinder for cutting, grinding and planing electrodes which are used in WIG/TIG welding machines. Consider country-specific regulations, standards and guidelines when using tungsten electrodes with thorium.

#### Versions:

ESG Plus<sup>2</sup>: A sensationThe first portable tungsten grinder with two different grinding wheels. This allows the electrode to be pre-ground with the coarse diamond wheel then finished with the fine diamond wh.

#### Comes with:

- Tungsten Grinder ESG Plus or ESG Plus<sup>2</sup>
- 1 Powder-coated steel carrying case
- 1 Diamond grinding wheel (medium, Code 790 052 488)
- 1 Tool to replace the grinding wheel
- 1 Set of operating instructions and spare parts list

#### Optional for the ESG Plus<sup>2</sup>

- 1 Diamond grinding wheel (coarse, Code 790 052 550)

Electric drive with single-phase AC motor:

Power: 500 W

Speed drive: 30,000 rpm

100% power-on time

## Diamond grinding wheel

Replaceable grinding wheel diamond-coated on both sides for optimal performance. For 1.0 and 1.6 mm (0.039 and 0.063 inch) electrodes we recommend the standard grinding wheel. For 2.0 mm (0.078 inch) and larger electrodes, a medium to coarse grained grinding wheel is advisable.

Item	Grain	Grinding wheel Ø [mm]	s [mm]	Code	kg

\* Other cutting lengths possible.

Item	Code	kg
Cutting device for ESG Plus	790 052 513	0.030

## Electrode holder

With clamping collet for clamping range 1.0 - 3.2 mm (0.039 - 0.126 inch), Code 790 052 481.

Item	Code	kg
Electrode holder	790 052 457	0.023

## Clamping collet

To center the electrode in the holder. For easy grinding of smaller electrodes. Flexible clamping collet for clamping range 1.0 - 3.2 mm (0.039 - 0.126 inch).

Item	Clamping range [mm]	Clamping range [inch]	Code	kg
Clamping collet	1.0 - 3.2	0.039 - 0.126	790 052 481	0.002

## Wall and table vice mounting plate

For stationary ESG Plus set-up.

Item	Code	kg
Wall-/table-/vice-mounting plate	790 052 483	0.102

## Protective cover

Easy to adapt on the ESG Plus head.

With integrated retainer for suction units. For use on electrodes with thorium.

Item	Code	kg
Protective cover for ESG Plus	790 052 496	0.220
Protective cover for ESG Plus <sup>2</sup>	790 052 596	0.220

## Double-Decker Kit

Easy to mount to the ESG Plus. This attachment makes it possible to use 2 different grinding wheels at the same time. The kit contains a head and a diamond grinding wheel (Code 790 052 550) with an extension shaft.

Item	Grinding angles [°]	Code	kg
Double-Decker Kit	15 / 18 / 22.5 / 30	790 052 490	0.160
Double-Decker Kit	15 / 30 / 45 / 60	790 052 390	0.160

# Orbital Welding Accessories

ORBIPURGE forming set

Inert gas outlets

Dual flow regulator

## ORBIPURGE forming set

Complete with Teflon gas hose and rapid-action couplings.

The ORBIPURGE forming set for tube internal diameters 12 - 110 mm (0.472 - 4.331 inch) includes all accessories for fast and efficient internal forming during orbital welding.

- The various stoppers match the internal diameter of the tube exactly and therefore form an optimally sealed forming gas chamber.
- The complete set is supplied in a durable plastic carrying case.
- The scope of delivery includes 2 forming plugs in each size, a Teflon gas hose, and a set of rapid-action couplings.
- The forming plugs cater for the complete range of between 12 – 110 mm fully. Forming plugs for greater diameters are available on request.
- The ORBIPURGE forming set is also particularly suitable where there are very high demands for purity in the forming atmosphere and is an ideal addition to our residual oxygen meter ORB 1001.
- The rapid-action couplings allow for simple separation and connection without having to screw the pressure regulator on and off for every operation.

Item	Tube ID [mm]	Tube ID [inch]	Code	kg
ORBIPURGE forming set	12.0 - 110.0	0.472 - 4.331	881 000 001	3.150

## Inert gas outlet for ORBIPURGE forming plugs

Suitable for all ORBIPURGE forming plugs.

Item	Code	kg
Inert gas outlet ORBIPURGE 3/8"	881 020 014	-
Inert gas outlet ORBIPURGE M5	881 020 015	-

## Flow regulator

With 2 adjustable flow displays and option to connect welding and forming gas.

Technical data	Argon
max. inlet pressure	230 bar / 3.000 psig
flow indicator	up to 30 L/min /60/160 scfg
cylinder connection	W21.8x1/14" /CGA 580
hose connection	9 1/4 / 5/8-18

Item	Version	Code	kg
Dual flow regulator	argon	888 000 001	1.850

# Orbital Welding Accessories

## Inspection set

Optimal tool for visually checking the welding seam, including lighting.  
Minimum sensor (length: 110 mm) complete with handle and attachable mirrors Ø 16 mm and 20 mm.

Item	Code		kg
Inspections set	875 030 020		0.190

## Bulb for inspection set

Replacement bulb for inspection set. Easy to change.

Item	Code		kg
Bulb inspection set	875 030 028		0.002

*Inspection set*

## Tungsten electrodes WS2

WS electrodes are used for DC and AC welding and are a completely satisfactory replacement for the WT electrodes.

Benefits:

- High ignition safety.
- Low combustion.
- Long service life.
- High arc quality.

Content: 10 pieces. Length: 175 mm (6.890 inch).

Composition: WS2 = Rare earths (mixed oxides).

Color code: turquoise.

*Tungsten electrodes WS2*

Item	Electrode Ø [mm]	Electrode Ø [inch]	Code		kg
Tungsten electrodes WS2	1.0	0.039	826 004 018		0.180
Tungsten electrodes WS2	1.6	0.063	826 004 019		0.180
Tungsten electrodes WS2	2.4	0.094	826 004 020		0.180

## TIG Manual Welding Torch

The TIG Manual Welding Torch from Orbitalum is a high productive welding torch for tacking and manual welding. The water cooled hand torch allows an ideal heat conduction and a long operating life. The compact design, the flexible cable assembly and the integrated operation control results in a high user-friendliness.

Max. 260 A power-on time at 60 %.

Item	Cable assembly (m)	Code		kg
TIG Manual Welding Torch	4.0	890 013 001		2.600
TIG Manual Welding Torch	8.0	890 013 002		-
TIG Manual Welding Torch	12.0	890 013 003		-

*TIG Manual Welding Torch*

# Rental & Training

## Factory Rentals + Consumables

E.H. Wachs offers short and long term rentals on a wide selection of Orbitalum Cutting + Welding products, which can be a highly cost effective alternative to purchasing. Call us today and we'll help match the right Orbitalum equipment to your specific project, and often we can ship a machine to you the same day.

Factory rentals are a great option for short term projects, or to support a quick turnaround with additional equipment. Factory rentals eliminate the need for a large capital outlay, and guarantees you'll always be using the latest technology for maximum productivity. Individually inspected and test before shipment, Orbitalum factory rentals arrive configured for your applications.

As part of our commitment to our customers Orbitalum factory rentals are priced competitively with outside parties, and in many cases at rates below the industry norm. Factory rentals and OEM consumables are now available for immediate shipment at many of our Sales, Service, and Rental Centers, for quicker delivery and better support. No matter if it's a Orbimat 165 Power Supply or enclosed weld heads, many of our rental customers find our machines so powerfully productive they choose to purchase one. So Rent with the Best. Rent with Orbitalum.

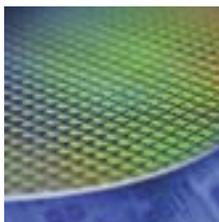

**Contact Us for Additional Information**  
**(800) 323-8185 or [sales@ehwachs.com](mailto:sales@ehwachs.com)**

## Factory Support + Training

Owning or renting the best equipment is sometimes not enough - if you don't know how to operate them, even the best tools are of limited use. With Orbitalum it's reassuring to know that if you have questions or need technical support with our products, we're here to back you up with factory trained customer service and technical representatives. This support comes included with every machine purchase or rental. Often times a quick phone call to us can get you up and running in just a few minutes.

We also offer, at our location or yours, training on our advanced cutting and orbital welding equipment, tailored to your exact application and your particular skill level. Your instructors are not just academics – all of them have real world experience and have benefitted from advanced instruction in Singen, Germany. Visit us online at [ehwachs.com](http://ehwachs.com) or contact your local Wachs or Orbitalum representative for additional details.

RENTAL BENEFITS	TRAINING BENEFITS
No Large Capital Outlays	Orbitalum Factory-Trained Instructors
No Storage or Repair Expenses	Learn Safe, Proper Operation
Minimizes Down Time	Train at our Location or Yours
Latest Technology Maximizes Productivity	Courses for New Grads or Seasoned Professionals

# ITW Partners

Miller Electric Mfg. Co., headquartered in Appleton, Wisconsin is a leading worldwide manufacturer of Miller arc welding machines [MillerWelds.com](http://MillerWelds.com)

Hobart Brothers manufactures premium welding filler metals, including stick electrodes and solid and tubular (flux cored and metal cored) wires. [HobartBrothers.com](http://HobartBrothers.com)

Pipe Welding Technology (PWT) is a manufacturer and supplier of equipment and tools for automatic welding in outdoor applications. [pwtsrl.com](http://pwtsrl.com)

ITW Insulation Systems is a leading manufacturer of high-performance mechanical insulation, vapor retarder film and metal jacketing for a wide range of industrial applications. [itwinsulation.com](http://itwinsulation.com)

Magnaflux is a global system solution manufacturer of non-destructive testing chemicals, equipment, and accessories. [magnaflux.com](http://magnaflux.com)

Wachs Subsea specializes in Subsea Cutting Solutions with products to support nearshore and offshore maintenance and repair in the oil & gas industry. [wachssubsea.com](http://wachssubsea.com)

## Our ITW Partners

When you partner with us you're not only partnering with the industry leader in portable weld preparation machine tools and orbital welding systems, you're partnering with ITW, the industry leader in advanced welding technologies.

ITW has a market leading portfolio of best in class brands offering reliable and responsible products for the markets we serve.

When reliability matters... We're there.
